

INNOVATION. NOT IMITATION.

New R Range caravan movers from Truma.

Unrivalled experience

With experience dating back to 1989, Truma were the first manufacturer to supply the caravan mover. And, as you would expect once we had educated our customers on just how useful caravan movers were, most of them couldn't imagine life without it.

From the original Carver mover, to the M1 mover, the Euro mover and the New Generation mover Truma continue to push the boundaries in product evolution, and today we're proud to put our name to the New R Range.

Offering more power, precision and versatility than ever before, our new R Range represents fantastic value for money whether it's your very first Truma mover or an upgrade.

We're proud of our history and passionate about our future and where others may imitate, at Truma we continue to innovate!

TE R Twin Axle Mover

5 year warranty as standard

Truma Quality with total peace of mind

The Truma 5 year warranty is exclusive to UK customers and comes as standard with every purchase.

Unrivalled customer service and investment into the Truma dealer training programme means that in the unusual event of a product failure, you'll be back in fine form, with the minimum of fuss in no time at all.

UK & European service network

Whether at home or abroad, you're never too far from a Truma service centre.

Comfort on the move

Comfort on the move

Did you know?

Truma leisure products have been setting the standards for over 60 years, and almost every caravan produced in the UK and Europe will have one or more Truma products factory fitted.

Whether it's gas systems, air conditioning, caravan movers, heating, ventilation or water products, when you invest in Truma you're investing in 60 years of engineering technology.

Your guide to R Range movers from Truma

Caravan movers reborn

Truma movers tried and tested

S R Single Axle Mover

If you're new to caravan movers you may want to start with the S R, which is suitable for single axle caravans up to a weight of 1,800kg.

One of the lightest manual engagement models available, the S R is engaged/disengaged via cross actuation kit, which is included in the price.

S R Single Axle Mover

SE R Automatic Engagement Single Axle Mover

The SE R is really up to the job, and is capable of moving caravans up to a weight of 2,000kg.

Electronic engagement and increased capability makes it an absolute dream to use, and as you would expect at just 33kg its one of the lightest in its class.

TE R Automatic Engagement Twin Axle Mover

Twin axle caravan owners will quickly recognise the benefits of the TE R which is capable of moving caravans of up to an astonishing 2,250kg.

If that doesn't impress then you only have to use the remote control to see just how strong this model is.

SE R Single Axle Mover
